/ EASILY IN THE MARKET

Pyrosoft is a management software for fireworks importers and traders, who want to trade their products in the European Market observing the 2013/29/EU Directive, through the fulfilment of the Module E requirements.

/ IMPORTERS AND TRADERS ONE CLICK AWAY

Pyrosoft provides a great connection among importers, traders, producers and laboratories, through which it is possible and easy to follow all the quality standards needed, in order to obtain the CE mark for fireworks.

Importers have a great tool to pass the technical information of their products and their orders to traders and producers, who will be able to review them, starting from their Module B. Laboratories are also directly connected to the tool, so Test Reports are quickly available.

Traders have the best option for their customers to have all the required information to put their products on the market available at any time. Moreover they can follow the whole process from when the order is made, until the issuing of the Declaration of conformity.

/ WE'LL GUIDE YOU STEP BY STEP

Once the products' batches have been created, Pyrosoft helps the importer to follow the process of the Batch quality control, by linking the information to the designated laboratory that will draw up the batch test report, through which it is possible to issue the Declaration of Conformity.

/ READY FOR THE MODULE E AUDIT

The whole process turns Pyrosoft into a Quality Management System, in order to meet the requirements of the European Directive. This is possible through a designated Quality section, where documents and records are created and stored, and through which companies can increase their standards by keeping track of audits and corrective actions that must be taken.
